

Plastic Bottle Car

Raid the recycling box and make a car!

You will need:

A plastic bottle

4 bottle tops (or Lego wheels)

2 straws

Sellotape

Something sharp to pierce the bottle

Optional: extra bottle top, string

1. Pierce a hole through the centre of each bottle top. An adult will need to help you with this.
2. Using tape, attach the straws to the underside of the bottle, one at the front and one at the back.
3. Place a bottle top of the end of each of the straws.
4. Decorate your car however you like!
5. If you would like to be able to pull the car along...Thread some string through another bottle top, tie a knot in the string and screw it onto the bottle.
