

We use Bee-bots to create and follow simple algorithms. Children learn to predict, test and debug programs to solve problems.

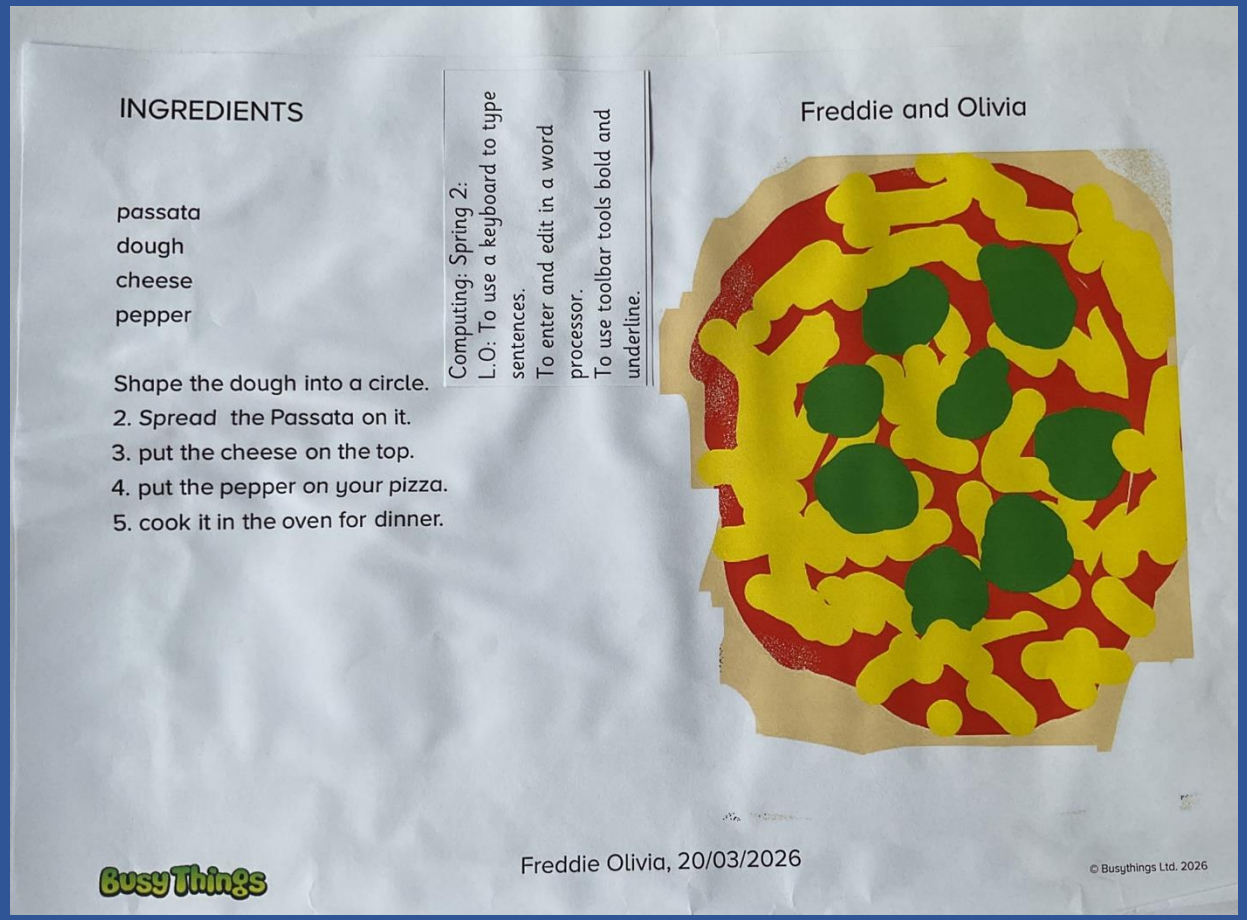

We create digital artwork using a range of tools and effects. Children learn how technology can be used creatively to express their ideas.

We collect, sort and present data using technology. Children learn how information can be organised to answer questions and solve problems

We use computers to create and edit text. Children learn how technology can help them present their ideas clearly and effectively.

INGREDIENTS

passata
dough
cheese
pepper

Shape the dough into a circle.
2. Spread the Passata on it.
3. put the cheese on the top.
4. put the pepper on your pizza.
5. cook it in the oven for dinner.

Computing: Spring 2:
L.O: To use a keyboard to type sentences.
To enter and edit in a word processor.
To use toolbar tools bold and underline.

Making it move.

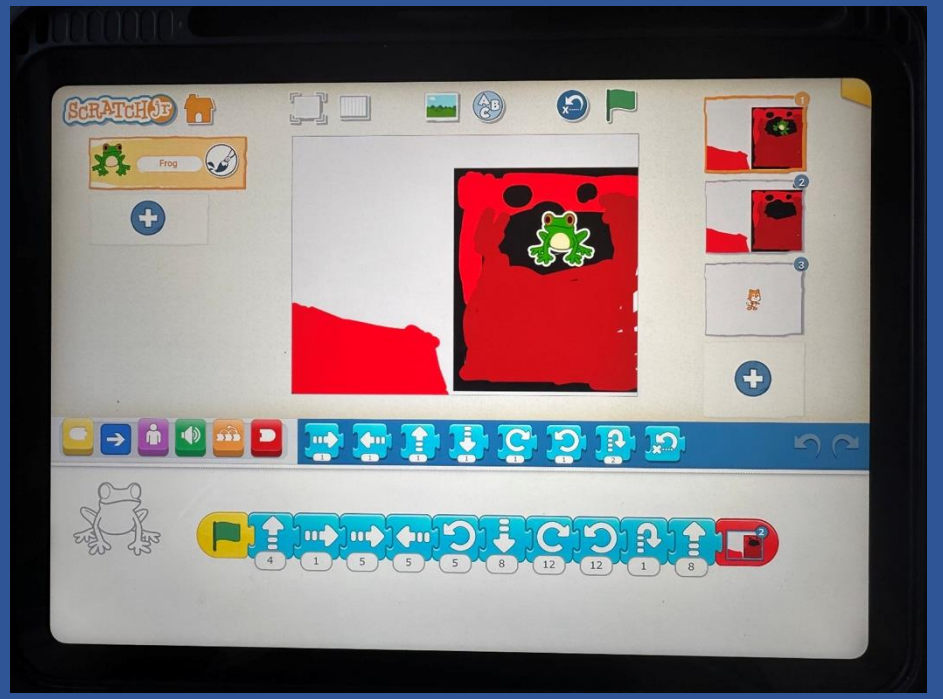

By Rachel Foster - Added 12 Jun 2026 02:11 PM

Notes

Today, the children explored digital creativity by using an iPad to bring Fern's drawing to life. Together, they learned how to animate a still picture, making the character appear to jump and bounce across the screen. The children were completely engaged and fascinated as they watched the drawing move, eagerly discussing what might happen next and suggesting new ideas. This exciting activity helped develop their understanding of technology, creativity, and sequencing, while encouraging communication, problem-solving, and curiosity about how animations are made. Seeing the artwork come to life was a magical experience for everyone!

We create interactive quizzes using simple code. Children learn how events and instructions work together to make programs respond.

A message to Mummy

Notes

Do you like my rainbow 🌈?

Primrose spent some time exploring new resources today. She asked to take a picture, which she did unaided, unsure what to do with it, together we came up with some options:
Send it to someone
Print it
So we decided to send it to her Mummy and print it!

We take and edit photographs for different purposes. Children learn how to capture images carefully and make creative choices when presenting them.

We use technology to explore rhythm and melody. Children create simple musical compostions using digital tools.

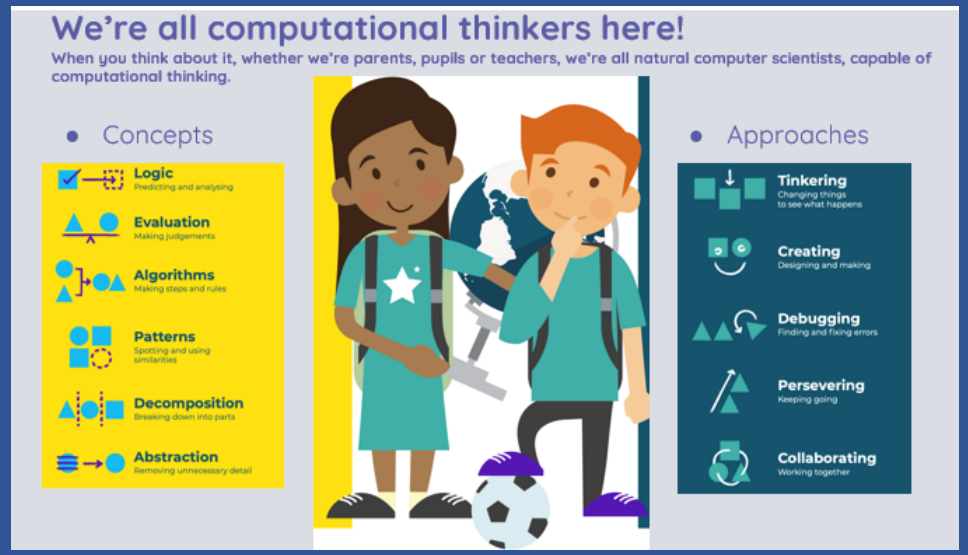

We explore how technology is used in school and everyday life. Children learn how digital devices help us to communicate, create and learn

We learn how to stay safe, healthy and responsible when using technology. Children understand that they always have choices and know who to ask for help if they are worried.

We use stories to support children's understanding of how to stay safe online.
