Geography

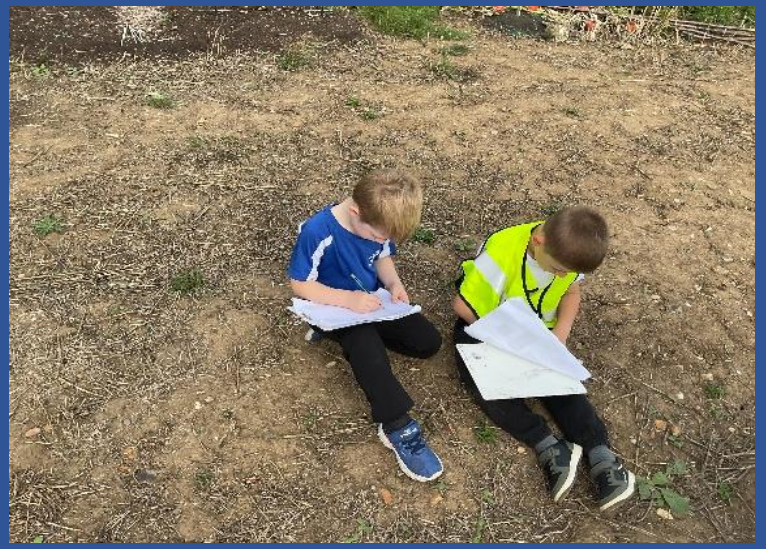

In geography children use a range of resources, including books and globes, to develop their geographical knowledge and deepen their understanding of the world around them.

Fieldwork gives children the opportunity to learn about the world through real life experiences.

Hands on learning in EYFS helps children to understand how the world can be represented in different ways. Using oranges, globes and maps, children explore how a round globe can be transformed into a flat map.

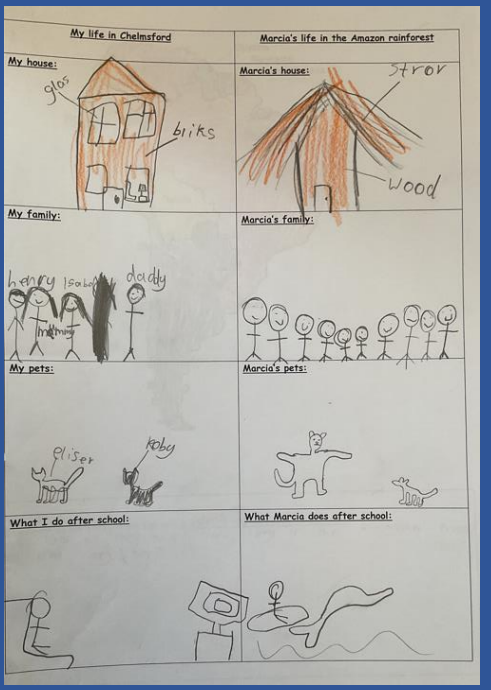

From EYFS to year 2, children develop understanding of the world by comparing Galleywood with places further away. They explore similarities and differences, considering landmarks, homes, environment and ways of life.

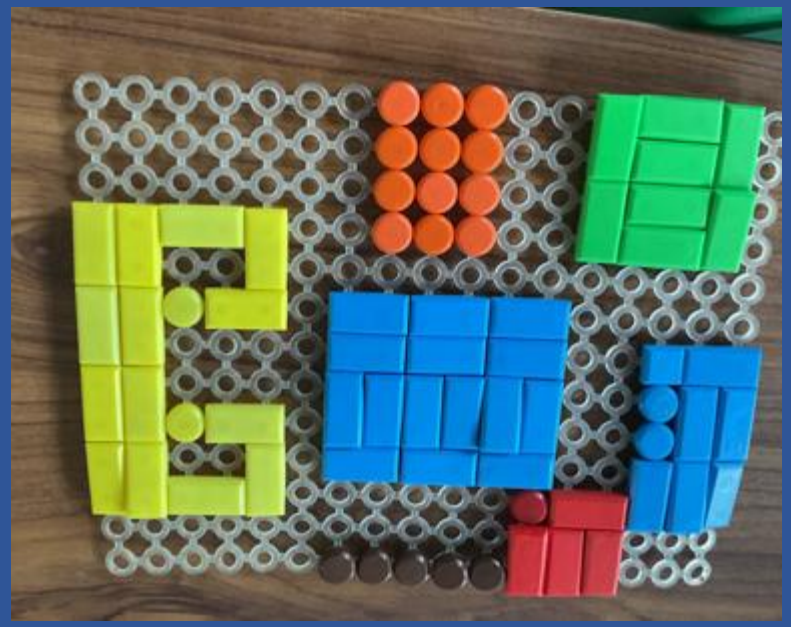

At Galleywood Infant School, we are fortunate to have strong links with local farmers and allotments, as well as Galleywood Common right on our doorstep. These rich local environments provide opportunities for children to explore, observe and ask questions about the places around them.

We made flags of countries that were competing in the World cup.

We made a map of our classroom. The colours are the colour names of the tables and the brown is our board.

We use practical equipment to help embed learning.
