RE

Throughout the year, we celebrate key dates in the Christian calendar, helping children develop understanding of Christian beliefs and traditions.

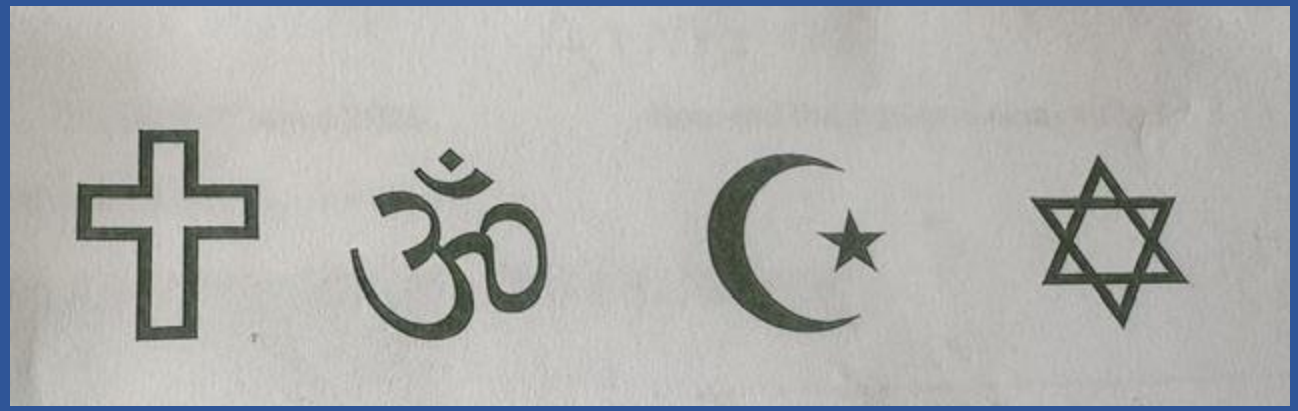

As part of Religious Education, children learn about the Christian celebration of Christmas.

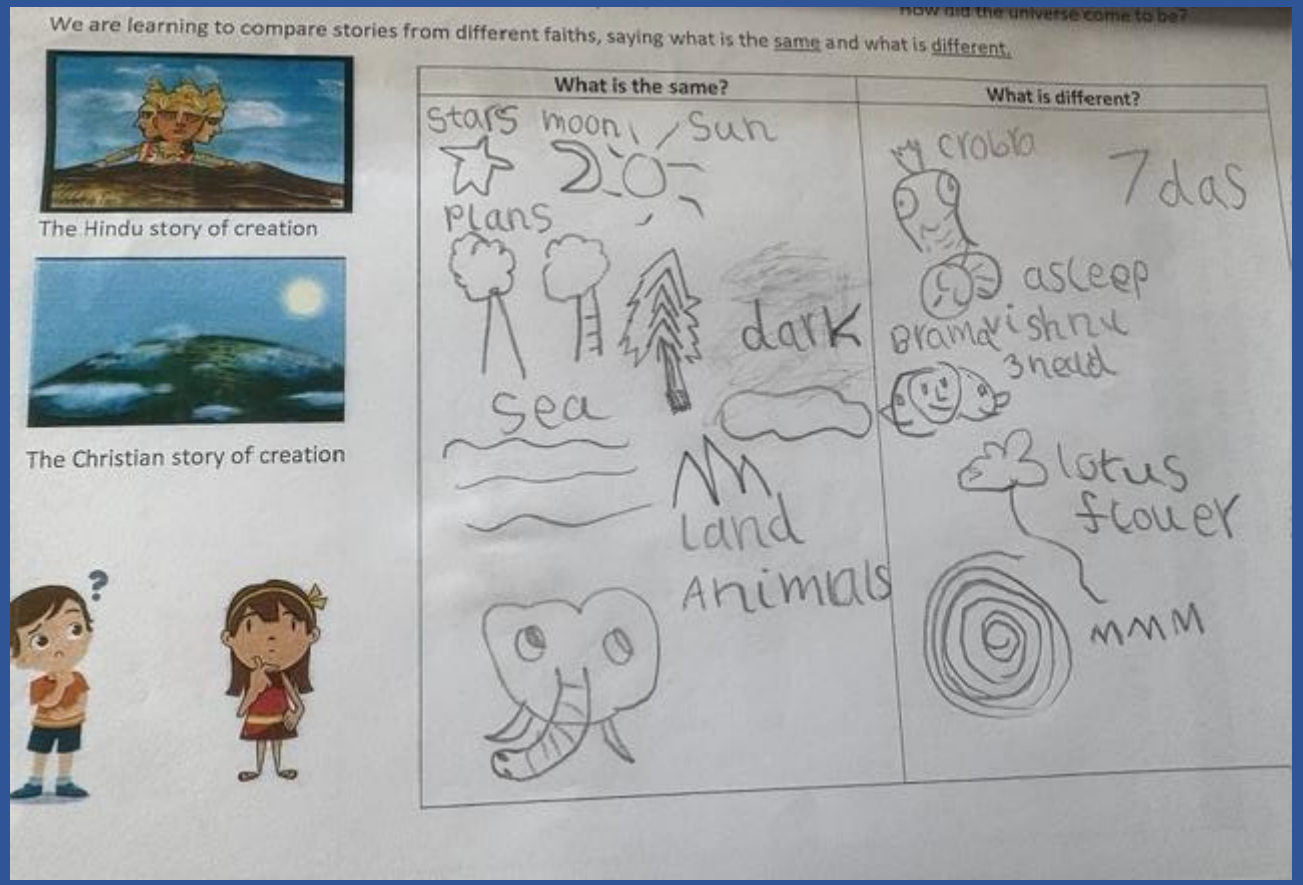

Performing allows children to explore in engaging and memorable way.

Children learn about Christianity, Hinduism, Islam and Judaism, exploring each religion's beliefs, practices, celebrations and symbols.

This helps pupils develop curiosity, respect and an understanding of the diverse world in which we live.

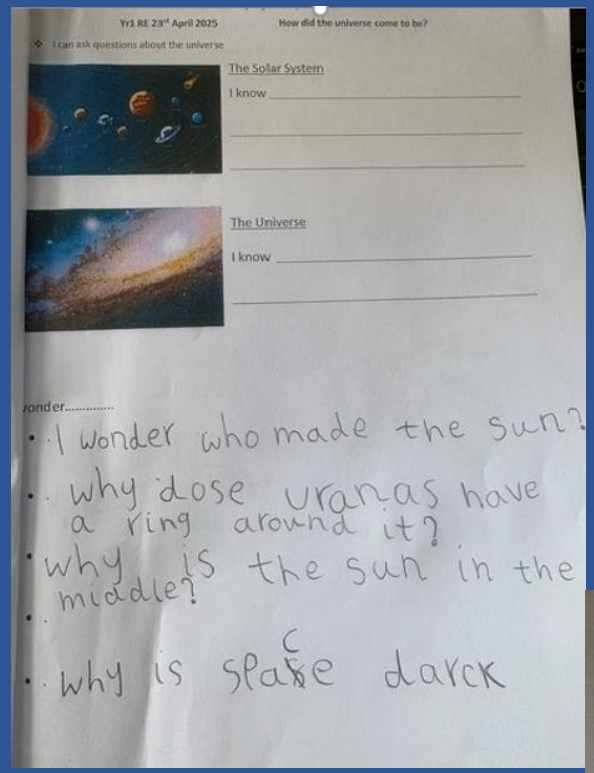

Children compare stories from different faiths, exploring the messages , values and beliefs they teach.

Religious Education is taught through engaging enquiry-based units, built around big questions.

Thinking Through Believing (Theology)

Thinking Through Thinking (Philosophy)

Thinking Through Living (Human and Social Sciences)

In EYFS, learning begins with the children's own experiences. They listen to religious stories, learn about important festivals, explore special places and objects, and begin asking questions about the world around them.

At Christmas our local vicar visits school and works with the children to retell the nativity story.

After learning about Diwali from their friends, we decided to create our own special celebration food. Some with candles, flat cakes, some with fruit, some flavoured with chocolate or strawberry.

In KS1 lessons include opportunities to handle artefacts, meet and learn from people of different faiths. Children record their learning through writing, artwork, drama and discussion.
